

# MyVitalz and your Home Health Agency

Beginning in January 2017, Nebraska's Department of Health and Human Services (DHHS) will add telemonitoring services to telehealth. This means that DHHS will reimburse Home Health Agencies \$6/patient/day for telehealth services that collect clinical information from the patient's home.

## Implementing MyVitalz Telemonitoring Services into your Home Health Agency means:

Better patient outcomes

Added value for your clients by reducing Readmissions, ER visits, and Length of Stay in hospitals

A potential profit of \$80/patient/month plus the ability to acquire more patients

## Healthier Patients for a Healthier Bottom Line:

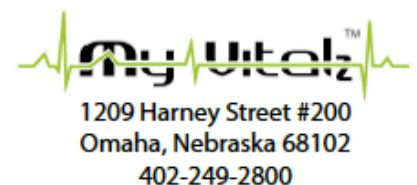

Let's assume you have a combination of 100 patients with diagnoses like CHF, COPD, Diabetes, Asthma, Pneumonia, High Risk Pregnancy, Hypertension, Organ Transplant or Mental Illness. All of those patients can benefit from MyVitalz Telemonitoring! At approximately \$80/patient/month profit, you could net an additional \$8,000/month just by using telemonitoring--not to mention the added value you provide for your clients by reducing Readmissions, ER Visits, and Length of Stay in the hospital (putting patients in your care sooner). By reducing risk and providing better outcomes, you have a competitive advantage over your competition and profit from more and more patients being sent your way.

Earn an extra  
**\$4,000/month**  
with 50 patients

Earn an extra  
**\$16,000/month**  
with 200 patients
